

Quality Education for a Small Price

Pre-schools and nurseries in numerous African countries often face overcrowding, insufficient resources, and a lack of trained educators, limiting the quality of early childhood education. This results in many children starting their formal education at a disadvantage, which can affect their academic and personal success.

The **Swiss School System project** (<https://school-sys.org>) is an educational system for schools with minimal resources. It consists of ❶ the simplest educational materials, combined with ❷ coaching, ❸ prepared lessons on an online platform and a ❹ controlling system. This enables exceptional teaching at minimal cost.

The Swiss sponsoring association **2givelife.org** (<https://2givelife.org>) develops this system and runs projects in Tanzania and South Africa.

Our **mission is to offer a meta-system** that systematizes education and enables rapid expansion through other partners. It is like a franchise system, for example McDonald's.

Swiss School System is documented, automated and standardized - with processes and checklists. This means the system can be expanded to hundreds of locations with thousands of schools.

Our vision is to change the fate of millions of children through an exceptional, value-based basic education that promotes personal responsibility and self-help. We work with local schools, organizations and businesses.

Funding comes from **donations** and school sponsorships. With an average of CHF 1200, we cover the annual costs of coaching a nursery or pre-school with 30-50 children and providing them with educational resources.

In the current **expansion stage GrowUp27** we want to expand the support to 500 schools and 20'000 children. This requires around CHF 600'000 annually.
